EDUCATION

University of Waterloo Sep. 2023 - Apr. 2027

Bachelor of Computer Science (BCS), Artificial Intelligence & Business Specialization

- Relevant Courses: Data Structures, Algorithm Design, Object-Oriented Development, Digital Logic, Functional Programming
- Scholarships: René Descartes National Scholarship (\$25,000), President's Scholarship of Distinction (\$2,000)
- Awards: 1st Place <u>2025 CxC Datathon</u> (Federato Track, \$3,500), Best Al Smart Contract Auditor <u>ETHDenver 2025</u> (\$3,000),
 1st Place <u>2024 BDO Future Leaders Challenge</u> (\$4,000), 1st Place <u>Hack the North 2022</u> (Sonr Track, 4x AirPods Max prize)
- Activities/Societies: Data Science Club (Vice President), Wat Street (Backend Engineer), WATonomous (Software Engineer)

EXPERIENCE

BirdseyePost, Software Engineer Intern | Toronto, ON

Jan. 2025 - Apr. 2025

- Spearheaded full-stack development and unit/E2E testing of <u>SnapCapture</u> (FastAPI, React, Redis, GCP Pub/Sub, Terraform, Pytest, Playwright)—a new real-time engagement & purchase attribution system that increased average app session duration by 35%
- Built internal web portal for managing print orders using Next.js & Postgres, enhancing visibility and managing over \$400K in ARR
- Made business analytics dashboard (Databricks, SQL) to process 4M+ profiles—boosted sales call conversion rates from 6% to 18%
- Created cart abandonment data ingestion pipeline with the Shopify API, deploying via Docker & Kubernetes to double throughput

Encore (YC F24), Software Engineer Contractor | San Francisco, CA

Oct. 2024 - Present

- Led in-app messaging & sharing feature for iOS/Android app (React Native, Swift)—3,000+ chat threads now being created daily
- Shipped AI feature for couples to discover personalized, local date ideas (GPT 4.1 API)—grew premium user conversion rate by 8%
- Optimized React hooks & function calls to reduce Convex database bandwidth costs by 22%, supporting 10,000+ daily active users

Garage (YC W24), Software Engineer Intern | New York City, NY

May 2024 - Aug. 2024

- Built website features and improved search/sorting algorithms with Next.js & Express, growing site traffic by 65% to 1,000+ DAUs
- Architected truck recommendation system using vector embeddings (OpenAl API, Pinecone) and Al appraisal tool (92% accuracy)
- Assembled web scraping pipeline (Python, Beautiful Soup, Supabase) to aggregate dataset of 1,500+ fire trucks and inform pricing

Royal Bank of Canada, Software Developer Intern | Toronto, ON

Jul. - Aug. 2023 | Jul. - Aug. 2022

- Automated PDF data extraction process with character recognition (Java, Tesseract OCR) to cut manual data entry time by 75%
- Processed RESTful API requests and improved system architecture to be able to handle 300,000 legal compliance cases per year
- Worked in weekly agile sprints to develop a secure internal URL shortener (Node.js, React, PostgreSQL), saving 50+ hours/month

Hatch Coding, Software Developer Intern | Toronto, ON

Jul. 2021 - Sep. 2021

- Contributed to and refactored core Python/JavaScript code across 400+ student projects, enhancing reliability and maintainability
- Improved usability and visual appeal of project templates using p5.js and Processing.py, boosting learner engagement by 19%

PROJECTS

BrokeChain | Python, FastAPI, Solidity, React JS, CSS, Express, OpenAI API, GitHub OAuth

- Built and fine-tuned an AI agent to scan Solidity smart contracts for security vulnerabilities, with GitHub OAuth integration
- Won \$3,000 USD at ETHDenver 2025 (the world's largest Ethereum conference), and got featured in Waterloo news article

Name the Pokémon | React TS, Next.js, Tailwind CSS, Express, Socket.IO, Vercel

Solo developed a Kahoot-style web multiplayer Pokémon guessing game using Next.js and WebSockets - namethepokemon.com

SKILLS

Languages: Python, JavaScript/TypeScript, Java, C/C++, Swift, SQL, Solidity, Racket, Bash, HTML/CSS Libraries/Frameworks: React/React Native, Next.js, Express, Tailwind CSS, FastAPI, Flask, Django, Scikit-learn, Pandas, NumPy

Tools: GCP/AWS/Azure, Postgres, Vercel, Cursor, OpenAl API, Supabase, Databricks, Convex, Terraform, Docker, K8s, Redis, Git
